

PriceLink™ 6.0

Update Your Navigator Portfolio

PriceLink™ is a Navigator™ add-on module that automatically updates market values for your entire security portfolio. PriceLink can retrieve the historical prices of your Navigator portfolio as far back as ten years.

Using an Extensive Securities Database

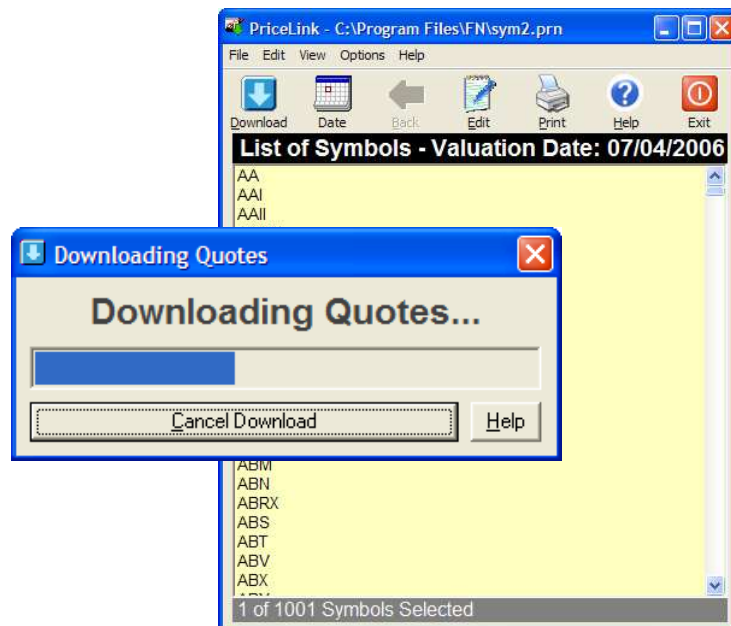

Prices are available for more than 60,000 marketable securities, including:

- Stocks
- Municipal bonds
- Mutual funds
- Treasuries
- Corporate bonds
- ADR evaluations
- Government bonds
- Asset-Backed Securities
- Traded options
- Warrants
- Agency bonds
- CMOs and more...

PriceLink uses data from FT Interactive Data, a leading provider of financial data to banks, brokerage firms, insurance companies, stock exchanges, and investment managers. PriceLink users pay FT Interactive Data a monthly fee, which varies with the type of security and number of prices downloaded.

Value Your Entire Portfolio

Download current and historical prices for your entire marketable securities portfolio. With one click, PriceLink retrieves the market values of your investments for the date you specify.

What's New in PriceLink 6.0

Scheduled Downloads – Schedule automated price downloads at regular intervals.

- **Enhanced Symbol Support**
 - Work with an increased number of symbols.
 - Allow PriceLink to remove duplicate symbols.
 - Search and Edit symbols within PriceLink.
- **Improved User Interface** – Work with a new interface that makes PriceLink easier to use than ever before.

How PriceLink Works

Select a menu choice from Navigator and PriceLink automatically:

- Loads your Navigator securities symbols.
- Connects to FT Interactive Data via dial-up or broadband connection.
- Transmits your symbols or CUSIP numbers to FT Interactive Data.
- Retrieves prices for the securities in your Navigator portfolio.

Save Time

Save time by letting PriceLink create your symbol list from your portfolio in Navigator and keep it up-to-date as you record investment transactions. PriceLink automatically updates the securities in your Navigator portfolio by retrieving current and historical prices.

Schedule Portfolio Updates

PriceLink can automatically download your marketable securities prices at a time that is most convenient for you. For example, schedule an automatic PriceLink download on the first day of each month before the markets open to get the previous month's closing prices.

PriceLink Overview

Securities covered	Stocks and mutual funds, plus ADR evaluations, treasuries, corporate and municipal bonds, government and agency bonds, traded options, warrants and CMOs.
Information retrieved	Historical (10 years) inter-day prices.
